Message to group administrators

Hello!

I am an artist and the developer of **Painter Reference**, a free app that helps artists organize and work with reference images.

Artists can create their own categories, add keywords, crop and rotate images, use grids and color tools, and optionally use AI editing.

Painter Reference is available on **iPhone, iPad, Android, and Windows**. A user's reference library and changes are **synchronized automatically across their devices** when they sign in with the same account.

I believe it may be useful to members of your group. May I share a short invitation asking artists to try it and provide feedback? I will follow the group's rules and will not post repeatedly.

Thank you,
Boris
